 M. twice. No issue found.

In the third generation of descendants of the third baron, there were 8 great-grandchildren, of whom none had any children whatsoever

Thomas Atherton and Mary Elizabeth had 35 descendants
and from my painstaking investigations all these lines died out.
All these descendants have died and
none are living in the present day.

In the first generation of descendants of the 3rd baron,
there were 10 children,
of whom 5 had children.
